DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 2-4 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 03-295794 A

JP ('794) shows a rudder assembly (figure 8) having a rudder member [3], a spoiler [5] intermediate the perimeter of the rudder. The spoiler is independently rotatable and is horizontally offset from the axis of rotation of the rudder.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Briggs (US 2,178,555 A).

Briggs shows a rudder assembly having a rudder member [9], a hollow cylindrical principal shaft [7] secured to the boat for rotation about its axis, a tab element [18, 19] accommodated intermediate the outer boundaries of the rudder, a secondary shaft [26] secured to the tab element via intermediate shaft [22] so as to be rotatably received in and extending beyond the principal shaft, and means to independently rotate the principal and the secondary shaft. A spoiler [12] is independently rotatable relative to the rudder.

Allowable Subject Matter

4. Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
